Benefits of Drivable Posts

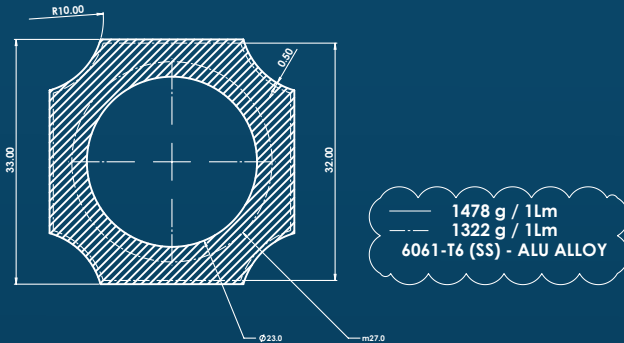

- **Fast Installs** - drivable Impact Posts and L-Impact Posts save 5-10 minutes per post, depending on soil, a typical 32 post project can save from 2.65 to 5.33-man hours per job. Increase production by 2-3 projects per week.
- **Lower overall costs** - no concrete to buy, transport, cure. Saving approximately 2 bags of concrete per post @ \$5.00 per bag x 32 posts is the equivalent of saving \$320 per project.
- **Lower Equipment Costs** - Initial investment for a Driver is \$2-3,000, less than a typical Beaver post hole digger.
- **With an aging and retiring workforce**, drivable Impact posts decrease employee injuries and improves employee satisfaction.
- **Solid Stable Less Settling** - in soils like clay or compacted soil, drivable posts provide a more stable base than concrete and less prone to settle than posts in concrete than can shift in the curing phase.
- **Environmental Benefits** - less concrete which reduces the carbon footprint of producing concrete thus reducing the environmental footprint, with less damage to the ecological system.
- **Impact Effect** - saves on man hours, reduces overtime, increases production and bottom line.

MADE IN AMERICA

PRIMEALUX IMPACT POST STIFFENER – 1.13125" x 1.3125"

03980MLF288

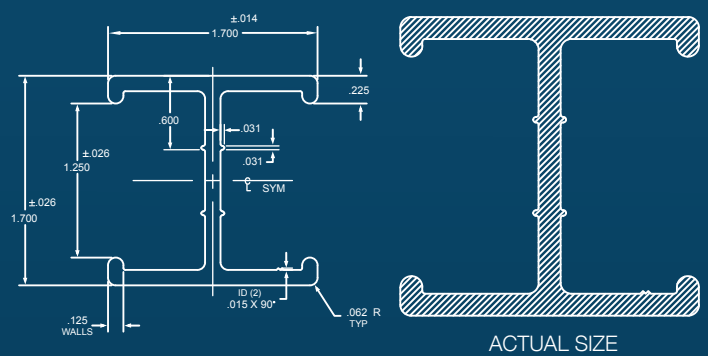

- Fits PrimeAlux Posts Only.
- Designed for residential, commercial PrimeAlux posts.
- Speeds installation process. No concrete or digging required.
- Drivable posts, no special adaptors needed. 6061-T6 Alloy.

IMPACT POST STIFFENER – 1.7" x 218"

03977MLF218

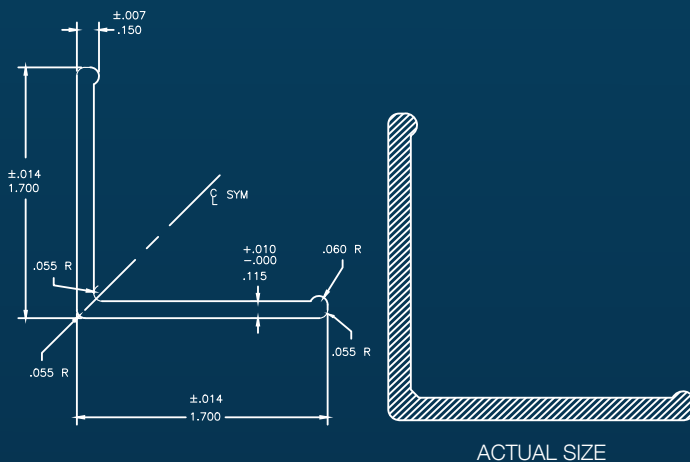

- Fits 2" light wall & heavy wall post.
- Designed for residential, commercial, standard & deco rails.
- Speeds installation process. No concrete or digging required.
- Drivable Post also available in 288"

L-IMPACT CORNER POST STIFFENER – 1.7" x 218"

03976MLF218

- Fits 2" light wall & heavy wall post.
- Designed for residential, commercial, standard & deco rails.
- Speeds installation process. No concrete or digging required.
- Drivable Post also available in 288"

IMPACT POST STIFFENER – 2.250" x 218"

03979MLF218

- Fits 2 1/2" light wall & heavy wall post.
- Designed for residential, commercial and standard & deco rails.
- Speeds installation process. No concrete or digging required.
- Drivable Post also available in 288"
